

USTA Tennis On Campus Fall Invitational Bid Policy

FALL INVITATIONAL

- The two (2) unique schools that win a bid from the Fall Invitational will be invited to the USTA TOC National Championship during the current year.
 - These schools will also be required to participate in their respective TOC Section event during the current year to “activate” their national bid.
 - If during the current academic year the school also becomes eligible for a bid from their TOC Section Championship, the invitational bid will take priority.
 - If schools are eligible for stipend money from their TOC Section Championship (based on the order of their finish), the USTA National office will match that stipend amount.
 - The Section office would pay the allotted stipend money to the Invitational bid winners from their section and be reimbursed by the USTA National office.
 - If a school finishes first in both the Invitational and their TOC Section Championship, their team photo for each respective event would be included in the tournament program for the USTA TOC National Championship.
 - If one or both of the schools fail to meet the standards to “activate” their participation at nationals, then the 3rd place team (and subsequently 4th place team) from the Fall Invitation would be contacted for participation and eligibility. Conversely, if these teams failed to meet standards, then the bids would go back to the national championship pool and be distributed at the tournament director’s discretion.
 - Schools do not have to meet any participation standards in order to register and play in the Fall Invitational event.
 - All NIRSA NCCS eligibility requirements for players will need to be met.

NOTE: Only one team per university/college can attend the USTA TOC National Championship
